Getting Started

“Basic Steps to Using Blackboard” contains key steps and information to using Blackboard for the first time. Blackboard is Texas Southern University’s choice for a course Learning Management System. All courses taught at Texas Southern University, whether face-to-face, hybrid, or online, are found in Blackboard. Once an instructor is officially assigned a course to teach, that course is accessible to use by simply typing their username and password at the Blackboard login site. As basic features, instructors can simply post announcements, load course materials, send emails to students, grade submitted assignments, and post grades in the Grade Center.

Texas Southern University’s Blackboard site can be found at <https://texsu.blackboard.com>.

System Requirements for Using Blackboard:

Operating System: Windows Vista, 7, 8, 10 and Mac OSX 10.7, 10.8, 10.9, 10.10

Memory: at least 512 MB, but higher is recommended

Modem/LAN card: with an internet service provider (56k modem, DSL, cable modems, or Wireless LAN cards preferred).

Web Browser Support: <https://goo.gl/TMHFgJ>

Browser checker: <https://goo.gl/Pc81c0>

Java: Blackboard Learn requires the latest version of Sun JRE 6. The JRE can be downloaded from https://www.java.com/en/download/windows_xpi.jsp. Please contact OIT (x4357) if you have difficulty installing Java on your office desktop computer.
