What the Students Say about the TSU Summer in Spain Program

My trip to Spain was fascinating. The trip was so amazing. I will forego the usual business acumen and speak from the heart. I had never experienced anything like this. My hat is off to TSU and the Spanish program for providing not only an educational experience, but the ultimate cultural experience. These activities allow the student to become totally immersed and learning Spanish becomes easier. Words do not adequately reveal how I feel about this trip. It was the trip of a lifetime! TSU did an outstanding job!

--Leslie Clark, Major: Business & Spanish

My experience on this trip to Spain organized by TSU was phenomenal, was a-dream-come-true, having traveled to the European continent and visited two countries like Spain and Portugal. I never imagined that this dream that I had since childhood was to meet in this way [...] going to a country as a foreign student is the best choice to travel because you live each day as if you were part of the city. The three weeks that we were in this study abroad program, I learned many things, I lived many experiences, and I enjoyed the culture, and most importantly I practiced my Spanish in a way as it had never been done before. [...] Everything was very organized from day one in Spain. My fellow TSU travelers that in fact most of them I had never met before, we get together as if we had been long-time friends. I think these values of unity and friendship are unique to students of TSU. Thank you TSU!

--Jose Macias, Major: Biology & Spanish

My experience in Spain studying abroad was an experience of a lifetime. Twelve prestigious Texas Southern University Students and I stayed in the beautiful city of Salamanca with host families and in dormitories. We had activities every day during which we were given tours of museums, churches, and historical landmarks. The teachers and tour guides were extremely knowledgeable and eager to answer all of our questions. I would encourage all Texas Southern students to apply for scholarships to study abroad as much as possible during their college careers.

--Chantelle Lewis, Major: Communication & Spanish

While developing assets has always been something I value, it was not the only mark I left in Spain. I believe I represented the United States rapid pace in a solely Spanish speaking environment such that there were only about ten students in each to a new class which encompassed the same sort of learning style, but highlighted different objectives. In evaluation of the administration, I am thankful for how efficiently and smoothly the process was run. [...] I am honored to have been a participant and scholarship recipient of the Texas Southern University Study Abroad Program.

--Mynesha Spencer, Major: Political Science; Minor: Spanish
