Community Resource Guide

What are Federally Qualified Health Centers (FQHCs)?
Federally Qualified Health Centers are community-based health care providers that receive funds from the HRSA Health Center Program to provide underserved areas. This makes health care affordable to you.

Learn About Clinical Trials Near You!

"Clinical trials are research studies performed in people that are aimed at evaluating a medical, surgical, or behavioral intervention. They are the primary way that researchers find out if a new treatment, like a new drug or diet or medical device (for example, a pacemaker) is safe and effective in people. Often a clinical trial is used to learn if a new treatment is more effective and/or has less harmful side effects than the standard treatment. Other clinical trials test ways to find a disease early, sometimes before there are symptoms. Still others test ways to prevent a health problem. A clinical trial may also look at how to make life better for people living with a life-threatening disease or a chronic health problem. Clinical trials sometimes study the role of caregivers or support groups." - National Institute of Health (NIH)

ClinicalTrials.gov is a great resource to find clinical trials. This guide can assist to help navigate the ClinicalTrials.gov website.

1. The homepage of the clinical trials website look like this. On the right side of the screen under “Find a study” you will enter in
   - condition or disease like diabetes or a type of cancer
   - other terms like a drug name
   - the location of the clinical trial including the county, city, state, and how far in miles you are willing to travel.
   - Click the blue search

2. After clicking search, the webpage will direct you to all clinical trials that fit the criteria entered. On the left side of the page will be a column of additional filters.
   - be sure to click "recruiting" in the status filter to view open studies
   - click to the plus sign on the additional filters to apply more options
   - click the blue "apply " button at the top of the column

3. Once all filters are added, relevant clinical trials will populate in the middle of the page.
4. Click on the study you are interested in. One the study details tab, you can learn more about the study description, outcome measure, eligibility criteria, and contacts and location for the study. Under contacts and locations you will find the name, phone number, and email address for the contacts of that particular study. Give them a call and express your interest in participation.
