THE GRADUATE SCHOOL
TEXAS SOUTHERN UNIVERSITY
GUIDELINES FOR PREPARING THE THESIS

The following procedures are provided to give guidance to master’s candidates in the preparation of theses for approval by the Graduate School of Texas Southern University. These procedures also incorporate the requirements established by Heckman Bindery, Inc., which will bind the final manuscript before it is placed in the Texas Southern University Library.

General Procedures

The master’s candidate must submit for approval to the Graduate School Office a typed copy of the thesis by the deadline posted by the Graduate School. The Graduate School Office will review the draft and indicate corrections that must be made before submission of the final copy. The final copy of the thesis must be submitted error free to the Graduate School Office by the deadline date set in the Graduate School calendar. A copy of the approved final draft of the thesis should be provided by the candidate to each member of the candidate’s final oral examining committee including the Graduate School representative at least two weeks before the scheduled date of the examination. Also, the candidate should bring a copy of the final thesis draft to the Graduate School Office for a determination as to compliance with format guidelines.

The candidate must submit an original and one copy of the thesis signed by the candidate’s advisor in black ink and the final approval form (ii) signed by all committee members. The approved unbound thesis must be delivered to the Graduate School Office in boxes at the time specified by the Graduate School calendar. The original and copy must be exact duplicates and the title page of each must be signed by the candidate’s advisor in black ink. The final copies must be accompanied by the final approval form, signed by the members of the thesis committee. In addition, at the same time the candidate must deliver three copies, including one original, of an abstract of his/her thesis. See Exhibit E for the format of the abstract. The abstract must not exceed 350 words in length.

Format of the Thesis

The following guidelines must be followed relative to the format of the thesis. Candidates are advised to confer with the Graduate School Office relative to questions concerning the format of the thesis.

The thesis must be neatly and correctly prepared. The final draft should be read several times to eliminate all errors – typographical, punctuation or format, etc. The thesis will be bound without further proofreading. Therefore, it is absolutely necessary for the student to proofread the final draft to ensure that the copy is free of errors, properly organized and neatly prepared. Each student is responsible for submitting the final thesis to the Graduate School after he/she has thoroughly proofread the material and has made all necessary
Parts of the Thesis

The thesis should consist of the following parts: (1) the Preliminaries (preface pages), (2) the Text (manuscript), (3) Appendix, and (4) the Reference section. The following outline lists the order in which the thesis should be arranged.

1. Preliminaries (use small Roman Numerals)
   a. Title Page - not numbered but counted as (i) (see Exhibit A)
   b. Thesis Committee Approval Sheet (ii) (see Exhibit B)
   c. Copyright Page (not numbered)
   d. Table of Contents (iii) (see Exhibit C)
   e. List of Tables (with titles and page numbers)
   f. List of Illustrations (with titles and page numbers)
   g. List of Symbols (with appropriate legends)
   h. Vita (Exhibit D)
   i. Dedication and/or Acknowledgements

2. Text (Arabic Numbers)
   a. CHAPTER 1 - Introduction
   b. CHAPTER 2 - History and/or Literary Review or Related Literature
   c. CHAPTER 3 - Design of the Study
   d. CHAPTER 4 - Results and Discussion
   e. CHAPTER 5 - Summary, Conclusions and Recommendations
      (Type Chapter Titles in ALL CAPS)

3. Appendix (Arabic Numbers)
   a. Title of Appendix

4. References/Bibliography (Arabic Numbers)
   Bibliography (Campbell’s format) or References (APA format)
   (for Natural Sciences – Turabian format)

5. Additional Documents Required
   a. Abstract of the Study

Typing the Thesis

The body of the thesis and the abstract must be double-spaced. Do not double-space footnotes, bibliographies, and tables (follow format prescribed by an authority). Long quotations should be single-spaced and indented at both margins. With this arrangement double quotation marks are not used, except in a series of quotation from different writers or to set off a quotation within a quotation.
**Typing Paper**

White bond, 8½” x 11”, opaque (original and copies 20 pound weight). The paper should be at least 100% cotton. Photocopy or Corrasable paper must not be used. Paper should be uniform throughout the thesis. Corrections or inserts in ink are not acceptable. The use of Ko-Rec-Type or Liquid Paper is not acceptable.

**Type Face (font or elements)**

The size and type face must be consistent throughout the thesis. Type size cannot be larger than 12 points. The type size can be 10 points in tables even though another type face is used in the main body of the thesis. Illustrations may be reduced photographically as needed. Laser Jet Printers should be used and checked for toner. **Dot matrix printing is not acceptable.**

**Reproductions**

Use a dry copying process with 20-pound bond paper with at least 100% cotton. No others are acceptable. The following types of reproduction may be used if prints are clear and black: Xerox, Mimeograph, and word processing. For the Xerox and word processing process, 20-pound bond paper with at least 100 percent cotton must be used. Blueprints are not acceptable.

**Spacing**

The main body of the thesis must be double-spaced, except for footnotes, bibliographies and tables. Use indented margins for long quotations, this eliminates the use of double quotation marks, except for a series of quotations from different writers or to indicate a quotation within a quotation.

**Margins**

Using 8½ x 11 inch paper, a margin of at least **one inch** (1") deep must be provided for the upper (top), lower (bottom), and right-hand sides and a margin of **one and one-half inches** (1½") must be allowed for the left-hand side. Thus, the text and page number are within 6 x 9 inch area. These margins must be used throughout the manuscript. Pages which carry major headings or chapter titles should begin **at least two inches** (2") from the top. Justifying right-hand margin is not required. Do not leave large gaps within lines of text.

**Page Numbers**

Every page, except the Title Page and the Copyright Page must be numbered. The Title Page is counted but not numbered on the page. The Copyright Page is not counted nor numbered.

The following format must be used in numbering the pages of the thesis.

1. The section of the thesis which carries the preliminaries should be numbered using small Roman Numerals (e.g., ii, iii, iv) placed at the bottom center. Thus, the Thesis Committee Approval Page would be number (ii), the Table of Contents (iii), etc. (See Page 2 for format.)

2. Arabic Numbers are used for numbering pages of the text in the thesis. Every page must be numbered consecutively from 1 to the end of the thesis. Numbers are placed in the upper right-hand
corner within ½ inch of the top margin area. Pages which carry major headings and chapter titles are numbered at the bottom of the page centered. The position of the number should be consistently followed, as indicated above, for all pages including those which bear illustrations, tables, etc.

3. The thesis which requires two volumes should carry the same Title Page for both with the addition of the words "Volume II" to the Title of the second volume. Both Roman Numerals and Arabic Numbers should be used in the manner indicated above and these should follow consecutively those numbers of the first volume. Again, the Title Page of the second volume is counted but not numbered. Small Roman Numerals are used for the remainder of the preface pages in Volume II of the thesis. Thus, if "vi" is the last Roman Numeral used in Volume I, then the Title Page of Volume II would be counted (no page number typed) as "vii", etc. A Table of Contents should be included in Volume II.

Illustrations (Tables, Graphs, Charts, etc.)

All tables, graphs, plates, charts, etc., must bear numerical identification, as well as legends and captions. These should be labeled consecutively. For example, Figure 1 should be followed by Figure 2 (using Arabic Numbers). Plate I should be followed by Plate II (using Roman Numerals); and Table 1 should be followed by Table 2 (using Arabic Numbers), etc. Numerical identification should be typed outside the area of the data presented in the table or chart but within the ½ inch typing space. Arabic Numbers should be used for tables and figures, and Roman Numerals for plates, charts, maps, and graphs. Use the same style consistently for captions throughout the manuscript. Do not use a letter suffix, such as 7a, 8a, etc., for any tables, figures, equations, etc.

Descriptions of illustrations that are too long to be placed below the illustration should be placed on the preceding page, above the center of the page and labeled with the figure number. Such legend pages should be numbered at the bottom center and typed on the same quality of paper as used throughout the manuscript. Use abbreviated table captions or figure legends for listing in the preliminaries. If a table is continued on another page, a line should be drawn below the table only when it is completed. See authority's format for tables which are continued on more than one page.

Footnotes to Tables

Footnotes to tables should appear immediately below the tables, not at the bottom of the page with the text footnotes. Use small letters ("a", "b", "c", etc.) for footnotes to illustrations. Text footnotes usually carry Arabic Numbers. An asterisk may be used to footnote illustrations if none of the tables in the manuscript has more than one footnote. Double and triple asterisks may be used if it is a universal symbol applicable to a particular field of study.

Closely related figures should be listed as a unit on one plate. Arrange legends in inverted pyramid style either above or below the illustration. Consistency should be followed throughout in the placement of legends. Each figure in the plate should be labeled with a small letter.
Illustrations should be identical in all copies of the thesis; photographic processes of duplication should be used. Do not use blueprint or non-permanent duplication processes, such as those prepared by the ammonia process (e.g., Ozalid). Avoid using mounted illustrations; page size illustrations are preferred. If possible, legends should be a part of the photography. Other acceptable reproduction processes are: Xerox, Mimeograph, and word processing.

The ink should be opaque and black when used in the preparation of drawings and graphs. Avoid using color variation for the identification of various parts of a drawing. It is better to use lines and symbols.

Illustrative or tabular materials should be of a size that would conform to the 6 x 9 inch text dimensions. If necessary, photographic processes may be used to reduce illustrations to the proper size. In some cases, it may be necessary to use a foldout to extend the right side of an illustration. The material to be folded should be mounted on a regular sheet of 8½ x 11 inch paper, leaving the required margin of one and one-half inches on the left side, and placing the fold, one and one-quarter inches (1¼”) from the right edge of the page. The page numbers should be placed on the mounting sheet. Illustrations smaller than 8½ x 11 inches must be mounted using a dry mounting process. Do not use transparent tape or staples for mounting illustrations.

Footnotes and Bibliographical/References List

The footnoting format should be consistent throughout the manuscript and conform to that of a standard, recognized authoritative reference, for example, a recognized professional journal, style manual, etc. The authoritative reference used for footnoting should also be the same as that used for reference citations or bibliographical references. Footnote references may be numbered consecutively throughout the manuscript or throughout each chapter. They may be placed in the body of the text or at the bottom of the appropriate page; these are better locations than at the end of chapters. Surnames of authors should be given first in bibliographies.

Use of Copyrighted Material

The thesis writer must assume full responsibility for his/her use of any copyrighted material in his/her manuscript. Written permission of the copyright owner must be obtained when extensive use is contemplated. "Extensive use" denotes more than 150 words in direct quotation from a single source.

Candidates should obtain permission to quote extensively from copyrighted materials. Such permission should be obtained from the author or from the publisher holding the copyright. Most likely authorization will be granted provided proper acknowledgement is given. However, some authors require payment for the use of extensive quotations from their copyrighted work.

Size of Thesis

If the thesis exceeds 400 pages, it will probably require binding in two volumes. If the thesis is
2½ inches or less in thickness when pressed down slightly it can probably be bound in one volume.

**Abstract of the Thesis**

An abstract is a summary of the thesis and should provide a brief synoptic overview of the contents of the thesis. The abstract should be written in essay form and include a statement of the problem, the procedure or methods used, results and conclusions; it should not exceed 350 words, about 2½ pages; most should be shorter. Do not use subheads, outlines, enumerations, or itemizations; nor should the abstract include tables, charts, diagrams, or footnotes. Mathematical formulas and other illustrative materials are not recommended for the printed abstract. The rules pertaining to margin size and page numbering previously described for the text should be followed in the abstract format (see page 3). The heading of the abstract should be arranged as indicated in Exhibit E of these guidelines.

**Binding of Thesis and Abstracts**

Every thesis accepted by Texas Southern University will be bound by Heckman Bindery, Inc. This action has been approved by the Graduate Council. The original and a copy of the thesis will be bound and stored in the Main Library of Texas Southern University. The candidate must arrange with an outside binding company and pay additional costs for binding copies of the thesis which are not submitted to the Graduate School Office.

**Graduation Fees (with Thesis)**

The graduation fee covers the cost of:

- Diploma
- Thesis Binding Costs (2 copies)
- Postage and Handling

**Information to be Submitted to the Graduate School**

1. Three (3) copies of abstract (one in each copy (2), one for the Graduate School)
2. Three (3) copies of vita (one in each copy (2), one for Graduate School)
3. Oral Examination Results (Thesis Defense)
4. Two (2) copies of the Signature Page (must be signed and included in each copy of the thesis.)

Alphonso Rudolph Beasley, M.S.
Texas Southern University, 2003
Professor Z. Daniel Nasely, Advisor

(Begin typing the abstract here, double-spaced; do not exceed 350 words.)

1

*If additional pages to abstract, page number should be in upper right corner.
Exhibit F – Format for Headings

CHAPTER HEADINGS

All Chapter Headings should be typed in all capital letters in the following pattern and centered on the page without punctuation. Use Arabic numbers for chapter titles.

CHAPTER 1

INTRODUCTION

CENTER HEADINGS (Sub-headings under Chapter Headings)

Sub-headings which are centered should be typed in upper and lower case letters, underlined and without punctuation such as:

Center Heading

SIDE HEADINGS

Sub-headings which are placed at the left margin should be typed in upper and lower case letters, underlined and without punctuation such as:

Side Heading

PARAGRAPH HEADINGS (Could be used in place of enumeration)

Sub-headings which are third level should be typed in upper and lower case letters, underlined, and with punctuation (you may use a period (.) or a colon(:) – but you must be consistent). They will be indented at the paragraph such as:

Paragraph Heading. (Text begins on the same line as the heading.)

*Headings may be typed in bold print.
THESIS DOCUMENTS
CHECK-OFF LIST

MASTER’S DEGREE

1. Two (2) copies of thesis on 100% cotton, bond paper – 1 original and 1 copy.
2. One (1) additional copy of vita and abstract for the Graduate School.
3. All signatures of thesis committee members must be on page ii of the thesis.
4. Signature of Thesis Advisor must be on the Title Page.
5. Make sure the TSU guidelines have been followed completely before submitting the document for binding.
6. Use APA Style Manual or other approved authority for preparing the manuscript, tables, figures, references.
