### Addendum 1

#### Questions & Answers

#### ITB # 717-25-712 Flight Training Devices

Question 1: By “hard shell” do you mean you want a full enclosed cockpit replicating the aircraft? Or are you referring to the console itself only?

Answer 1: This request not required. Texas Southern University will consider all options presented.

Question 2: If “hard shell” is not referring to a full cockpit, do you have a preference on the location of school branding? For example, the seat, frame, or console?

Answer 2: School branding should go on the monitors.

Question 3: 3. Do you need any ongoing support after the standard warranty period?

Answer 3: Yes, Standard warranty plus annual support contract warranty.

Question 4: As we finalize our proposal, we would like to kindly seek clarification on the delivery timeline requirements to ensure full compliance with TSU’s expectations. To align our logistics planning with TSU’s needs, could you please confirm:

Is the 14-calendar-day delivery window strictly enforced, or is there flexibility for extended timelines under certain circumstances? If flexibility exists, what is the maximum allowable delivery period that TSU would accept without disqualifying the bid?

Answer 4: Our timeline is May 4<sup>th</sup> for delivery of the simulation.
