**What is the GRE?**

(Source: <https://gre.economist.com/gre-advice/gre-overview/what-gre> )

The Graduate Record Examinations (GRE) is a computer-administered test used by many graduate programs to assess potential applicants. The test is adaptive by section, meaning that your score in previous sections influences the difficulty of upcoming sections.

**The GRE takes roughly 3 hours and 45 minutes to complete.**

**There are three sections to the GRE:**

1. Analytical Writing
2. Verbal Reasoning
3. Quantitative Reasoning

**How the GRE is structured:**

- Analytical Writing - Essay 1 (30 minutes)
- Analytical Writing - Essay 2 (30 minutes)
- Break (10 minutes)
- Verbal (30 min) or Quantitative (35 min) or Experimental
- Verbal (30 min) or Quantitative (35 min) or Experimental
- Break (10 minutes)
- Verbal (30 min) or Quantitative (35 min) or Experimental
- Verbal (30 min) or Quantitative (35 min) or Experimental
- Verbal (30 min) or Quantitative (35 min) or Experimental

\*Note that if you encounter an experimental section, there will be only one, and it can occur at any point after the Analytical Writing section. Alternatively, you may encounter a "research" section, which will be identified as such and occur at the end of your exam.

**How the GRE is scored:**

Both the Verbal and Quantitative Reasoning sections of the GRE are scored in one-point increments on a scale from 130-170. Your raw score (each question counts for the same amount of points) will be converted to the final 130-170 scale.

The Analytical Writing section is scored by both a human rater and an ETS program known as an e-rater. Your essays are graded in half-point increments from 0-6. In case of a disagreement of more than a point, a second human rater is brought; the final score is then the average of the two human grades.
